RESTRICTION RESPONSE AND AMENDMENT

ASSISTANT COMMISSIONER FOR PATENTS
WASHINGTON, D.C. 20231

SIR:

In response to the restriction requirement of March 26, 2003, the applicants elect Group 1, with traverse, corresponding to claims 1-11 drawn to a carbon monoxide transforming apparatus.

The proper criteria for restriction between distinct inventions are provided in MPEP §803. The two criteria are (1) the inventions must be independent or distinct as claimed and (2) there must be a *serious* burden on the examiner if restriction is not required. Regarding the second criterion, if the search and examination of an entire application can be made without a serious burden, the examiner *must* examine it on the merits, even though it includes claims to independent or distinct inventions (MPEP §803 (emphasis ours)).

Although the Office Action has identified separate classifications, making a prima face case of a serious burden, it is respectfully submitted that there is no serious burden in searching and examining the entire application. The restriction does not address this issue.
